01 MISSION BRIEFING

MISSION OBJECTIVE Build maximal strength, work capacity, and structural durability under load — transferable output, not just gym numbers.	LONG MISSION STRATEGIC TARGET By RTB (Week 13): exceed every Week 1 benchmark on load, reps, and conditioning pace, with movement quality holding under fatigue.
--	--

Four phases, thirteen weeks. Volume and intensity are set to your chosen training frequency — not a template with days deleted. Every session: 5-minute mobility warm-up → main strength work → conditioning finisher.

- Designate Your Heading** (Wk 1–3) — baseline load, technique standard. Tempo 3-1-1-0, 60–70% 1RM.
- Golden Hour** (Wk 4–7) — progressive overload begins, volume climbs with load. Tempo 2-1-1-0, 72–82% 1RM.
- Hold the Line** (Wk 8–11) — peak intensity, volume trims as load peaks. Tempo 1-0-X-0, 85–93% 1RM.
- RTB** (Wk 12–13) — deload, then retest every Week 1 number.

Read Safety Briefing and Copyright & Disclaimer before Week 1, Day 1.

02 SAFETY BRIEFING

-
- 01 Always complete the 5-minute mobility warm-up before loading any weight — cold tissue under a heavy kettlebell, mace, or sandbag is how minor issues become real ones.
-
- 02 Technique before load. If form breaks down on a rep, drop the weight before you drop the standard — every exercise in this manual is linked to a form-check video for exactly this reason.
-
- 03 Soreness is normal. Sharp, sudden, or radiating pain is not — stop the movement immediately if it happens and don't push through it.
-
- 04 Progress load only when every prescribed rep at the current weight moves clean. Chasing a heavier number before technique is locked in is the single most common cause of injury in this kind of training.
-
- 05 Hydrate and fuel appropriately around training, especially if you're training in a hot climate.
-
- 06 Give at least one full day of rest between sessions that hit the same movement pattern hard — recovery is part of the program, not a break from it.
-
- 07 If you're new to structured training, returning after an injury, pregnant, or managing any health condition, get medical clearance before starting this or any exercise program.

04 5-MINUTE MOBILITY WARM-UP

Run this before every session in this manual, no exceptions. Six movements, roughly 45 seconds each — five minutes, full body, ready to load.

MOVEMENT	DURATION	NOTES
Cat-Cow Flow	45 sec	Slow, full range — mobilize the spine before anything else loads it
World's Greatest Stretch	45 sec / side	Hip flexor, hamstring, and thoracic rotation in one movement
Arm Circles + Shoulder CARs	45 sec	Small to large circles, then slow controlled articular rotations
Hip CARs	45 sec / side	Slow controlled hip circles — full range, no momentum
Bodyweight Squat to Stand	45 sec	Sit into a deep squat, stand tall, repeat — wake up the hips and ankles
Inchworm Walkout	45 sec	Walk hands out to a plank, walk feet up to hands, stand — full-body primer
